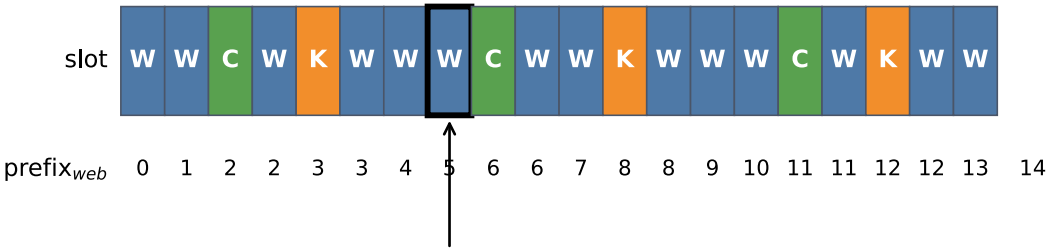
W = web, K = wiki, C = code; prefix = web slots among the first i slots



t = 47 = 2 periods + remainder 7; slot 7 (outlined) is web

drawn = 2 * 14 + prefix[7] = 33; epoch 0, index 33

walk in a 64-point domain: 33 -> 60 -> 26; the last value is below 50

so the document is Pi(33) = 26
